Java Full Stack Developer with 3+ years of experience in designing and developing enterprise-grade applications using **Java, Spring Boot, Hibernate, and Microservices architecture**. Skilled in building responsive **front-end interfaces (Angular)** and integrating with **REST APIs and cloud platforms (AWS)**. Proficient in **databases (MySQL, PostgreSQL), CI/CD (Jenkins, Docker, Git)**, and delivering **high-quality, scalable, and optimized solutions** within **Agile** environments.

EXPERIENCE

Aug 2022 – Present (3+ YEARS)

Java Full stack Developer, [e-Zest Solutions](#).

- Designed and developed **scalable modules and microservices** using Java, Spring Boot, Angular, and REST APIs.
- Built and integrated **secure API endpoints** ensuring seamless data flow between front-end and back-end systems.
- Led cross-functional teams to troubleshoot and resolve **30+ production issues**, improving bug detection and reducing resolution time by **25%** through CI/CD and code review processes.
- Collaborated with Product Owners to refine user stories, resulting in **25% improved user satisfaction** and **20% higher user engagement**.
- Managed complete software delivery lifecycle including **frontend (Angular), backend (Spring Boot)**, deployment, and performance debugging.

Sep 2020 – Nov 2020 (3 Months)

Web Developer Intern, [Knowlexon innovation and technology Pvt. Ltd.](#)

- Designed responsive websites using **HTML5, CSS3, JavaScript** and optimized front-end performance.
- Developed and tested reusable code components and enhanced application functionality.

EDUCATION

2019 - 2022

BACHELOR OF ENGINEERING, G. S. MOZE COLLEGE OF ENGINEERING, PUNE

2016 - 2019

DIPLOMA OF EDUCATION, SMT. S. S. PATIL INSTITUTE OF TECHNOLOGY, CHOPDA,

2014 - 2016

SSC BOARD, K. NARKHEDE VIDYALAYA, BHUSAWAL

CERTIFIED COURSE

- **Full Stack Advanced Java Certification** (C/C++, HTML5/CSS3, JavaScript, Angular, Core Java, Advanced Java, Spring Boot, Hibernate) – Profound Edutech, Pune (Apr 2022)

TECHNICAL SKILLS

- Java
- Spring Boot
- Hibernate
- Microservices
- REST APIs
- Kubernetes / Docker / Jenkins
- Angular
- JavaScript, jQuery, TypeScript
- HTML 5 / CSS 3 / SCSS
- Git/GitHub, Tortoise SVN
- AWS (EC2, S3, RDS)
- Maven
- MySQL / MongoDB / PostgreSQL
- Jasper Reports
- Elastic Search
- RabbitMQ / ActiveMQ

SOFT SKILLS

- Team Leadership
- Time Management
- Adaptability
- Cross-functional Collaboration
- Problem-Solving
- Effective Communication

PROJECTS

- **PRODUCT RECOMMENDATION SYSTEM,**

A product recommendation system is a tool that recommends products to a client and suggests which products should be kept together for more selling. This tool takes the billing data of customers and product data as input. The technology used in this software is Java and the front end is designed in Java Swing. It is a helpful software for offline stores to increase sales and efficient management of products in store.

- **WEB FLAW DETECTOR USING SQL-INJECTION,**

A web flaw detector is software that finds vulnerabilities in websites and generates reports of bugs. It used XSS and SQL-Injection methods to find vulnerabilities.

ACTIVITIES

- **TECHNICAL EVENT COORDINATOR AT GRADUATION,**

I have Coordinated Technical events at graduation. There we arranged all technical games and competitions. There I learned skills like team management, time management, and organizational skills and many more.
